EXPERIENCE

n11.com, iOS Software Engineer

10/2024 – Present | Istanbul, Turkey

- Primary iOS engineer assigned to Chatbot domain with no prior documentation or handover; closed 33 of 36 open backlog items within one month, eliminating a 12-month iOS-Android feature gap.
- Co-managed Chatbot domain end-to-end during team-lead vacancy: owned Sprint Planning, backlog grooming, design reviews, and quarterly roadmapping alongside Product Management.
- Built and shipped a company-wide internal test automation tool that cut mobile regression runtime from ~3 minutes to ~10 seconds; adopted by all mobile QA engineers and developers.
- Developed an internal TestFlight distribution app in continuous use since release, eliminating manual build distribution for the mobile team.
- Delivered contributions across every module of the B2B Seller Management Panel over 6+ months: product listing, order management, and campaign features.
- Initiated SwiftUI migration for Chatbot; designing DebugKit, an SPM library for iOS debugging workflows, targeting open-source release.
- Primary knowledge owner for Chatbot iOS; runs internal tech sessions to upskill the broader mobile engineering group.

n11.com, iOS Developer Intern

08/2024 – 10/2024 | Istanbul, Turkey

- Replicated core n11 iOS application as a fully functional lightweight clone within ~one month of joining, demonstrating production-level Swift proficiency from day one.
- Received two competing full-time offers upon internship completion; accepted position with original host team.

EDUCATION

B.Sc., Software Engineering, Istinye University

2021 – 2025 | Istanbul, Turkey

- GPA: 3.06 / 4.00
- Capstone project NetSecure officially approved by the national research council.

TECHNICAL SKILLS

- **Languages & Frameworks:** Swift, SwiftUI, UIKit
- **Architecture:** VIPER, MVVM, MVP, Dependency Injection, Clean Architecture, Modularization
- **Tools:** Xcode, Git, TestFlight, SPM, AdMob, StoreKit (In-App Purchases), App Store Connect
- **Testing/Networking:** Unit Testing, UI Testing, Test Automation, RESTful APIs, JSON
- **AI / ML:** Supervised model training (NSL-KDD), on-device inference pipeline, AI-assisted development
- **Practices:** Agile, Scrum, Sprint Planning, Backlog Refinement, Quarterly Roadmapping

PROJECTS

NetSecure - SwiftUI & Core ML,

2025

Capstone Project - National Research Council Approved

- Trained a supervised ML model on the NSL-KDD dataset; built a full pipeline capturing live network traffic via Scapy (Python backend) for real-time anomaly detection on iOS.
- Received official national research council approval; demonstrates applied expertise across iOS, backend systems, and machine learning.

Spades: VIP Card Game - UIKit, AdMob, StoreKit 📄 , Live on App Store

PhotoPrep: Compress & Resize - UIKit 📄 , Live on App Store
